

Medical Professional Opportunities

North  Care
WOMEN'S CLINIC

THE MISSION

We exist to compassionately empower individuals to make healthy and informed decisions regarding their pregnancies and to be a leader in promoting positive sexual values. North Care Women's Clinic's goal is that no woman in our community would feel as though abortion is her only option. Through compassionate, professional care we seek to be the hands and feet of Jesus to women and families in a crisis situation.

Every client gets a client advocate, someone who will walk alongside them through this whole experience and to listen to their hopes, dreams, and greatest fears, with complete confidentiality and no judgement. Our amazing medical team offers pregnancy testing, STD testing and ultrasound, to give clients critical medical information they need to make their decision. Our ultrasounds help date the pregnancy, confirm viability, and screen for ectopic pregnancy, arming the client with knowledge about their situation. Through STD testing we are reaching people who are participating in sexually risky behavior, putting them at higher risk of unplanned pregnancy in the future. Our nurses use these opportunities to help women reflect on their life choices and think about their value and worth.

We would love to have you join our team in a way that would be mutually beneficial for both you and the ministry. Medical professionals allow us to further our mission of offering more services to more women, and North Care is an amazing way for medical professionals to serve God and their community.

RESPONSIBILITIES

There are options for different levels of involvement. The time commitment can be tailored to the schedule and availability of the medical professional, but typically is about 1 to 2 hours a month or week.

Out of clinic, work remotely responsibilities could include:

- Review and sign ultrasound scans
- Review and recommend treatment for positive STD tests
- Approve Policy and Procedures
- Be available for RN questions
- Give recommendations on Clinic issues
- Advise and help with new projects

In clinic help

- Perform ultrasounds, STD tests/treatment, physical exams, blood draws

FAQ'S
